

W D - bands for woodworking industry

Reko LTD offers the special bands and belts for woodworking industry as well as vast variety of grinding, scraping, brushy, polishing and the other similar machines in this industrial branch.

Bands contain two up to three layers of PE (polyester) fabric and the thick rubber-made frictional layer.

Bands are manufactured also in various hardness values and with various surface design (structure) for a large utilisation field:

- LP: ovals forms 25 x 5 mm - with a higher friction factor, for varnished and polished block stones.
- K 10: quadrangles 10 x 10 mm - a standard for optimal grinding and deflaking.
- K 15: quadrangles 15 x 15 mm - a standard for the vacuum/operated machines.
- R 20: rhombuses 20 x 20 mm - for special cases and vacuum operations.

The standard production program:

Designation	Lazers	Hardness	Thickness	Max. load	Minim. drum \varnothing	Production scale
	Quantitz	ShA	mm	N/mm	mm	mm
WD 2060 LP 25	2	60	8-9	18	100	1100
WD 2060 K 10	2	60	8-9	18	100	1100
WD 2070 LP 25	2	70	8-9	18	100	900/1100
WD 2070 K 10	2	70	8-9	18	100	900/1100
WD 3060 LP 25	3	60	10	24	120	1100/1400
WD 3060 K 10	3	60	10	24	120	1100/1400
WD 3060 R 20	3	60	10	24	120	1100/1400
WD 3070 hladký	3	70	10	24	120	1100/1400
WD 3070 K 10	3	70	10	24	120	1100/1400

A special production technology has been used in order to achieve a perfect and regular surface of endless band. The European top quality and outstanding properties of material are the basis for a success of these bands on the market. In case of your interest in, do not hesitate to contact us, we are ready to provide you with further information data on the basis of a factual request, including any other possibilities and materials.
